

SOS Home Edition Setup

This SOS Home Edition package contains a USB 3.0 flash drive device which holds the SOS Home installation files, the Curriculum files for the courses you ordered, and a **Quick Start Guide** in PDF format. Also, in the package is a sticker with your serial number. You will need that during installation.

Note: Depending on the Curriculum you ordered, your package may contain two USB 3.0 flash drive devices to accommodate multiple subject sets.

The directory structure on the flash drive device looks like this:

- **Curriculum** - Contains your purchased subjects.
- **InstallDisk** - Contains installation files, other required software, and tools.
- **Quick Start Guide** (PDF) - Explains how to install and set up SOS.

Steps:

1. Plug the flash drive device into a USB port on your computer.
2. If you have **AutoPlay** configured to open for all media and devices, when the **AutoPlay** window opens, select the **Open folder to view files** option. Otherwise, use **Windows Explorer** (on Windows 7) or **File Explorer** (on Windows 8.1 and 10) to browse to the drive containing the flash drive device. For example, on your computer, it may be drive (D:).
3. Double-click the **Quick Start Guide** to open the guide for application and curriculum installation instructions.

Note: The **Quick Start Guide** requires a PDF Reader, such as Adobe® Acrobat® Reader®. If you do not already have a PDF Reader, browse the device to the **InstallDisk** folder, then to the **Adobe Reader** folder and double-click the Acrobat application file to install.
